Make a model

- Show some real pictures
- then the model
- change angles
- show what was done in preparation of the flooding
- Show the water rising
- Show present, add grass @ waters edge
- Now drain and show what's left
  Paint brown/grey.
  Remove all shrubs

- Model - Contours
- Roads + new road
- Raise water, ensure 2 islands are formed and road submerges - check elevations
- Correct if necessary.
- Drain and detail model
- Paint & fil with water to original level
