Looking for : AS-BUILT drawings for locks in the (old) Cornwall Canal System Flooded in 1958

Specifically : Lock # 21 @ Dickinson Landing
Lock # 22 @ Farran Point

These locks were built and upgraded between 1834 and 1904
The canal system was operated and administered until 1958 by:
the Department of Railways & Canals

from their Montreal (St. Lambert) and Cornwall office
(Perhaps some info left in Brockville too)

Approximately 10 years ago, National Archives visited these 2 offices and removed many boxes of information, probably containing what I am looking for.

① Blue binder

RG 43 Finding Aid # 29 (list of years)

D. Department of ~~Railroads~~ Railways and Canals
Legal Records 1791 - 1957
I Transcribed Legal Documents
